DETAILED ACTION

Election/Restrictions

Upon further evaluation of the application, the election requirement mailed March 3, 2005 has been withdrawn. Applicant was contacted and told of the change.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-3,5,12-15,17,18 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5500635 (Mott).

Mott teaches footwear (see the entire disclosure, specifically the embodiments shown in figures 13-24) having a translucent sole insert (translucent lens 842) with an effect device (see figure 22), a LED (726,728-736 and 826; Mott teaches LED's can be in varies different locations), a speaker (see col. 14, lines 27-29), a pressure switch (718,818), a audio/visual control processor and PROM (780; see col. 14, lines 22-30 and col. 15, lines 12-27), a battery, and a sensor being a temperature monitor (738; see col. 14, lines 4-7).

3. Claims 1-3,5,6-8 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4020572 (Chiaramont, Jr.).

Chairamont teaches footwear having a translucent U-shaped sole insert (23) with an effect device (42), a LED (C), a control processor (see figure 3-4), and a battery (26).

Claim Rejections - 35 USC § 103

Page 3

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 6-8 and 11 rejected under 35 U.S.C. 103(a) as being unpatentable over Mott '635 in view of US 5546681 (Goldston et al).

Mott teaches footwear as claimed (see the rejection above) except for the translucent sole insert being u-shaped. Goldston teaches a similar device wherein the LED's extend around the perimeter of the heel and therefore the transparent insert (20) is U-shaped. It would have been obvious to provide the footwear of Mott with the LED's and the translucent sole insert extending further around the heel perimeter of the shoe (U-shaped), as taught by Goldston, to provide greater visibility.

6. Claims 16 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mott as applied to claims 15 and 18 above, and further in view of US 4510704 (Johnson).

Johnson teaches footwear having a pulse monitor; see col. 5, line 64 to col. 6, line 3. It would have been obvious to provide the footwear of Mott with a pulse monitor, as taught by Johnson, to provide additional information to the wearer.

Application/Control Number: 10/697,151 Page 4

Art Unit: 3728

Allowable Subject Matter

7. Claims 4,9 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. The following is a statement of reasons for the indication of allowable subject matter: The closest prior art with regard to "mirror material", in claims 4,9 and 10, was the US Patent 4112601 (Chiaramonte, Jr). Although, the mirror material (reflective material) is found within the sole wall (15) and not "behind said translucent sole insert for reflecting said externally visual light through said translucent sole insert".

Conclusion

- 9. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111, including:
- -"The reply must present arguments pointing out the *specific* distinctions believed to render the claims, including any newly presented claims, patentable over any applied references."
- --"A general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section."

-Moreover, "The prompt development of a clear issue requires that the replies of the applicant meet the objections to and rejections of the claims. Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06" MPEP 714.02. The "disclosure" includes the <u>claims</u>, the specification and the drawings.

10. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). Other useful information can be
